Setup PPTP VPN on Windows XP

English version

CREATE VPN CONNECTION

STEP 1. Click **start** button and open **Control Panel**STEP 2. Click **Network and Internet Connections**

STEP 3. Select **Create a connection to the network at your workplace**

STEP 4. Change to **Virtual Private Network connection** and hit **Next**

STEP 5. Give the connection a name in **Company Name** field and click **Next**. Select **Do not dial the initial connection** (If you will see a new window)

STEP 6. Enter your **Hostname** (look PPTP info text file in control panel) and hit **Next**

STEP 7. Select **Add shortcut to this connection to my desktop** checkbox and hit **Finish**

STEP 8. Click on the newly created VPN connection **shortcut**. Enter your login info (look PPTP info text file in control panel). Select the **Save this user name and password** checkbox and click **Connect**.

NB! *Never use remember password option on public computers! If someone connects with your details when you online, you will be disconnected!*

STEP 9. Right click on the VPN Network icon in system tray and hit **Disconnect** when you finish

DELETE VPN CONNECTION

STEP 1. Open your **Network and Internet Connections** (see STEP 1 and STEP 2 above) and click **Network Connections**

STEP 2. Right click on the VPN Connection and click **Delete**
